What's New in Version in 2.1.1

The 2.1.1 release of the NeedToMeet Outlook Add-in resolves several issues discovered since the release of the 2.1.1 version and adds several new features.

Release Notes 2.1.1

- The ability to populate the To field in a new meeting poll request by selecting contacts in the Outlook Contacts view has been added. (2446)
- An issue where the grid view of the My NeedToMeet Meeting window was compressed when viewed at 200% has been resolved. (6236)
- An issue where the calendar timeline view of the My NeedToMeet Meeting window was not correctly scaled when viewed at 200% has been resolved. (6238)
- An issue where the status bar of a meeting window was very small when viewed at 200% has been resolved. (6240)
- An issue where the To list box of the New NeedToMeet Meeting window was compressed when viewed at 200% has been resolved. (6242)
- An issue where the new email form ribbon was not correctly scaled when viewed at 200% has been resolved. (6246)
- The NeedToMeet Configuration Wizard now includes the ability to check your contacts for NeedToMeet users and then grant permission to your availability to found users and/or request permission to their availability. (11297)
- An issue where the To field of a single attendee, private response meeting was blank after receiving responses has been resolved. (13272)
- The "Click Here" link has been updated to direct to the correct webpage: <http://www.needtomeet.com/download-outlook-add-in>. (14282)
- A typographical error in the new version alert has been corrected. (14283)
- The first day of the week displayed on the Week calendar view (showing weekend) on the New NeedToMeet Meeting screen and My Meetings screen can now be changed in the Outlook Calendar Options. (14427)
- An issue where a new meeting poll was not responding when attempting to remove an attendee has been resolved. (14509)
- An issue where the timeline view was not updated correctly when adding more than 24 attendees has been resolved. (14655)
